

AMENDMENTS TO THE CLAIMS

The following is a complete listing of the claims indicating the current status of each claim and including amendments currently entered as highlighted.

1. (Currently Amended) A communications link between a processing device having an infrared port and a second device, comprising:

- (a) an attachment configuration formed as an adjustable clip having an upper clamping portion, a lower clamping portion and a biasing element disposed between said upper clamping portion and said lower clamping portion, said adjustable clip being configured for attachment to a plurality of different size devices by adjusting a distance between said upper clamping portion and said lower clamping portion, said distance being at least adjustable between 10mm and 20mm;
- (b) an infrared interface, wherein said infrared interface is mechanically connected to said attachment configuration; and
- (c) a communications cable, wherein said communications cable is operationally connected to said infrared interface.

2. (Original) An infrared communications link comprising:

- (a) a processing device having an infrared port; and
- (b) the communications link of claim 1; wherein said attachment configuration is configured for attachment to said processing device and said infrared interface is maintained in optical alignment with said infrared port.

3. (Canceled)

4. (Original) The communications link according to claim 1 wherein said attachment configuration is formed as a unitary flexible clip having at least two clamping surfaces.

5. (Canceled)

6. (Original) The communications link according to claim 1 wherein said communications cable includes an optical fiber.

7. (Original) The communications link according to claim 1 wherein said communications cable includes an electrically conducting wire.

8. (Original) The communications link according to claim 7 further comprising an electrical plug configured for attachment to the second device, wherein said electrical plug is electrically connected to said communications cable.

9. (Original) The communications link according to claim 7 wherein said infrared interface includes a power source.

10-20. (Cancelled)
